

SAKSHI SAH

Bhubaneswar, Odisha | 6299414167 | sakshiisah123@gmail.com

LinkedIn: <https://www.linkedin.com/in/sakshi-sah-531a6a2aa>

Github: <https://github.com/SAKSHI1243/SAKSHI1243>

Computer Science undergraduate (CGPA: 9.06) with strong foundations in data structures, object-oriented programming, databases, and machine learning. Experienced in developing AI-powered applications, integrating REST APIs, and working with Python, Java, SQL, and modern development tools. Demonstrated problem-solving ability through Smart India Hackathon achievements, open-source contributions, and 300+ solved coding problems. Interested in data engineering, analytics, cloud technologies, and AI-driven solutions.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, C, C++ (Basic).
- **Web Development:** HTML, CSS, Javascript, React.js, Flask, Fast API
- **Database & Tools:** MySQL, Git, GitHub.
- **AI & Machine Learning:** Regression, Classification, Random Forest, SVM, XGBoost, NLP Libraries: Scikit-learn, Pandas, NumPy, Seaborn
- **Core CS Concepts:** Data Structures and Algorithms (DSA), OOP, Software Development, Operating Systems, DBMS, Computer Networks.

EDUCATION

Bachelor of Technology in CSE | KIIT University | 2023–2027 | CGPA: 9.06/10 .

CBSE (Class XII) | VJ International School | 2022 | 85.4% .

ICSE (Class X) | St. Joseph's School | 2020 | 89% .

TECHNICAL PROJECTS

CircularAI — Intelligent Reverse Logistics Platform (Amazon Hackathon)

Tech Stack: FastAPI, Python, Computer Vision, Asynchronous Programming

- Designed and implemented an end-to-end automated reverse-logistics infrastructure utilizing a hybrid AI decision engine to route returned inventory through optimal recycling/resale pipelines.
- Developed an asynchronous FastAPI backend to handle real-time image data streams, orchestrating a Computer Vision pipeline for multi-class product degradation grading (Grades A/B/C).
- Engineered system workflows that decoupled data ingestion from downstream analytical processing, improving system throughput under simulated peak load.

HireSense AI — Semantic ATS & Resume Intelligence Platform

Tech Stack: Python, NLP (Sentence Transformers), Streamlit, Scikit-learn, Plotly

- Architected a high-performance semantic processing engine utilizing Sentence Transformers to execute real-time vector embeddings and cosine similarity mapping for large-scale document matching.
- Built an automated text extraction and tokenization pipeline to parse irregular PDF data into structured relational formats, minimizing data truncation errors.

- Formulated unit-testing frameworks to validate semantic scoring metrics against baseline text models, ensuring continuous integration reliability via Git version control.

Live Demo-<https://hiresense-ai-y4hxzmzkz7kl7phxs53crkg.streamlit.app/>
github-<https://github.com/SAKSHI1243/HireSense-AI>

Phishing Link Detection Using Machine Learning:

Tech Stack: Python, Scikit-learn, Pandas, Hyperparameter Optimization

- Engineered an optimized machine learning classifier evaluating a 11,430-row URL dataset utilizing 88 distinct statistical and structural vector features.
- Implemented cross-validated grid searching (GridSearchCV) to tune tree depth and split criteria, reducing model overfitting and elevating production-level inference accuracy to 96.24%.

ACHIEVEMENTS & CERTIFICATIONS

Data Structures & Algorithms: Solved 350+ algorithmic problems across LeetCode and GeeksforGeeks, demonstrating proficiency in Dynamic Programming, Graph Theory, and Tree traversals.

- **Smart India Hackathon (SIH):** College-level Runner-Up (2nd out of 502 teams).

Spearheaded the system architecture for a high-concurrency crowdsourced civic-reporting application.

Certifications: Oracle OCI (Oracle University), IBM AI Fundamentals, Tata Generative AI

Languages: English, Hindi (Fluent).
