Bhubaneswar, Odisha | 6299414167 | sakshiisah123@gmail.com

LinkedIn: <https://www.linkedin.com/in/sakshi-sah-531a6a2aa>

GitHub: <https://github.com/SAKSHI1243>

Computer Science undergraduate (CGPA: 9.06) with strong foundations in data structures, object-oriented programming, databases, and machine learning. Experienced in developing AI-powered applications, integrating REST APIs, and working with Python, Java, SQL, and modern development tools. Demonstrated problem-solving ability through Smart India Hackathon achievements, open-source contributions, and 350+ solved coding problems. Interested in data engineering, analytics, cloud technologies, and AI-driven solutions.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL, Java, C, C++ (Basic)
- **Web Development:** React.js, FastAPI, Flask, HTML5, CSS3, JavaScript (ES6+)
- **Databases & Tools:** MySQL, Qdrant Vector DB, Git, GitHub, Linux, Docker
- **Machine Learning & AI:** PyTorch, TensorFlow, Scikit-learn, NLP, Sentence Transformers, LLM API Integration (Anthropic/OpenAI), Pandas, NumPy, Plotly
- **Core Computer Science:** Data Structures & Algorithms (DSA), OOP, Operating Systems, DBMS, Computer Networks, System Design

EDUCATION

Bachelor of Technology in CSE | KIIT University | 2023–2027 | CGPA: 9.06/10 .

CBSE (Class XII) | VJ International School | 2022 | 85.4% .

ICSE (Class X) | St. Joseph's School | 2020 | 89% .

TECHNICAL PROJECTS

CircularAI — Intelligent Reverse Logistics Platform (Amazon Hackathon) | *FastAPI, Python, OpenCV, PyTorch, Asyncio*

- Designed and implemented an end-to-end automated reverse-logistics infrastructure utilizing a hybrid AI decision engine to route returned inventory through optimal recycling/resale pipelines.
- Developed an asynchronous FastAPI backend to handle real-time image data streams, orchestrating a Computer Vision pipeline for multi-class product degradation grading (Grades A/B/C).
- Engineered asynchronous system workflows that decoupled data ingestion from downstream analytical processing, maximizing system throughput under simulated peak load.

HireSense AI — Semantic ATS & Resume Intelligence Platform | *Python, Sentence Transformers, Streamlit, Scikit-learn, Plotly*

- Architected a high-performance semantic processing engine utilizing Sentence Transformers to execute real-time vector embeddings and cosine similarity mapping for document matching.
- Built an automated text extraction and tokenization pipeline to parse irregular PDF data into structured relational formats, minimizing data truncation errors.
- Formulated unit-testing frameworks to validate semantic scoring metrics against baseline text models, ensuring continuous integration reliability via Git version control.

AI-Powered IP Novelty Estimator | *React, Anthropic Claude API, JavaScript, CSS3*

- Designed and deployed a lightweight React application that leverages LLMs to perform rapid, first-pass novelty analysis on complex invention descriptions.
- Engineered robust system prompts to enforce structured JSON outputs from Claude AI, ensuring reliable generation of quantitative novelty scores (0–100) and risk categorization.
- Implemented a dynamic UX featuring real-time analysis rendering, interactive patent similarity breakdown cards, and actionable differentiation suggestions.
- Optimized frontend state management within a single-component architecture to handle asynchronous API streaming, error states, and secure client-side API key management.

Phishing Link Detection Using Machine Learning | *Python, Scikit-learn, Random Forest, Pandas*

- Engineered an optimized Random Forest classifier evaluating an 11,430-row URL dataset utilizing 88 distinct statistical and structural vector features.
- Implemented cross-validated grid searching (GridSearchCV) to tune tree depth and split criteria, reducing model overfitting and elevating production-level inference accuracy to 96.24%.

ACHIEVEMENTS & CERTIFICATIONS

Data Structures & Algorithms: Solved 350+ algorithmic problems across LeetCode and GeeksforGeeks, demonstrating proficiency in Dynamic Programming, Graph Theory, and Tree traversals.

• **Smart India Hackathon (SIH):** College-level Runner-Up (2nd out of 502 teams). Spearheaded the system architecture for a high-concurrency crowdsourced civic-reporting application.

Certifications: Oracle OCI (Oracle University), IBM AI Fundamentals, Tata Generative AI

Languages: English, Hindi (Fluent).
